

# MSOM Lunch and Learn Webinar Series

**Thursday, January 18<sup>th</sup> at 12pm CST:**

**Usable LEAN**

**Presented By: Jim Burgin**

This presentation will be full of examples of LEAN principles that do, do not, and should work. This discussion will have transferable information for home, office and manufacturing. Jim teaches classes using stories, and you will hear a few in this webinar. The presentation will discuss how a process map and Value Stream Mapping showed how temporary workers were making significant decisions on quality. It will also discuss how Just in Time inventory ties in with Kroger, Sam's Club, Cosco, Dash Buttons, and Amazon Prime. You will hear about how morning coffee provides a real world Kanban example that saves people from a grumpy caffeine-deprived person. We will also discuss 5S and the many ways it can be useful to you. Here's hoping you can find an hour to expand your mind on LEAN!

**Jim Burgin** - MSOM Adjunct Instructor, University of Arkansas

Jim Burgin has been an instructor for the MSOM program teaching Quality Management and Maintenance Management for the last six years and he recently began teaching Organizing for Change. He is a retired USAF Lt Col with a BS in Industrial Engineering and an MBA with an emphasis in finance. In addition to his military career, Jim brings experience in quality management, auditing with medium sized manufacturers and a background as a director of maintenance for a large food producer. He has significant experience with LEAN production and how it works in the real world.
